The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Kejriwal et al U.S. Patent Number 6,704,794.

Re Claim 1, Kejriwal et al teaches a cell-processing pipeline having plurality of stages for cell assembly. Fig. 2 depicts Line Aggregation 202 (an interface) coupled to a public network for transmitting and receiving data packets and Packet aggregation 205, Packet Pipeline 240, Output Packet Organizer 250 (a plurality of packet processing portions) for sequentially processing the data packet in a pipeline according to the header information (See col. 3, lines 20 ~ col. 4, lines 1-28).

Response to Arguments

3. Applicant's arguments filed 4/21/05 have been fully considered but they are not persuasive.

Applicant argues that, "packet processing pipeline and output packet organizer 250 does not process the data packet".

Examiner disagrees.

"packet processing pipeline and output packet organizer 250" does process the data packet. Furthermore, the claim does not require any specific processing function for the data packet. The "packet processing pipeline" and "output packet organizer" both process the received data packet from interface.

Furthermore, claim 1 does not define what a pipeline fashion.

The sequence starting form Line Aggregation 202, Packet Aggregation 205, via 206 back to 202 is the pipeline fashion.

Allowable Subject Matter

4. Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

In combination with Claims 1 and 2, prior art fails to teach the combination of packet processing portions, wherein a plurality of header analyzing processors for sequentially analyzing the packet to be analyzed transferred from the packet separation processor in accordance to a header encapsulated in the packet to be analyzed, and then reflecting an analyzed result in the tag of the packet to be analyzed, and outputting an analyzed packet and a packet reassembling processor for requesting the remainder of the packet to be analyzed stored in the packet separating processor.

Application/Control Number: 09/899,531

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Lee whose telephone number is 571-272-3130. The examiner can normally be reached on Monday to Friday from 8:30AM to 6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ricky Ngo can be reached on 571-272-3139. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
